

# Factors that affect country readiness: Thailand experiences

Petchsri Sirinirund

Adviser to HIV Policy and Programme

DDC, MOPH

24 Sep 2015

# Main points

## (National consultation, Dec 2010)

- Who are our target populations?
- How to access them?
- How to access the services?
- Key services
  - Outreach services
  - HCT
  - STI services
  - Linkage to care and treatment

### Concerns:

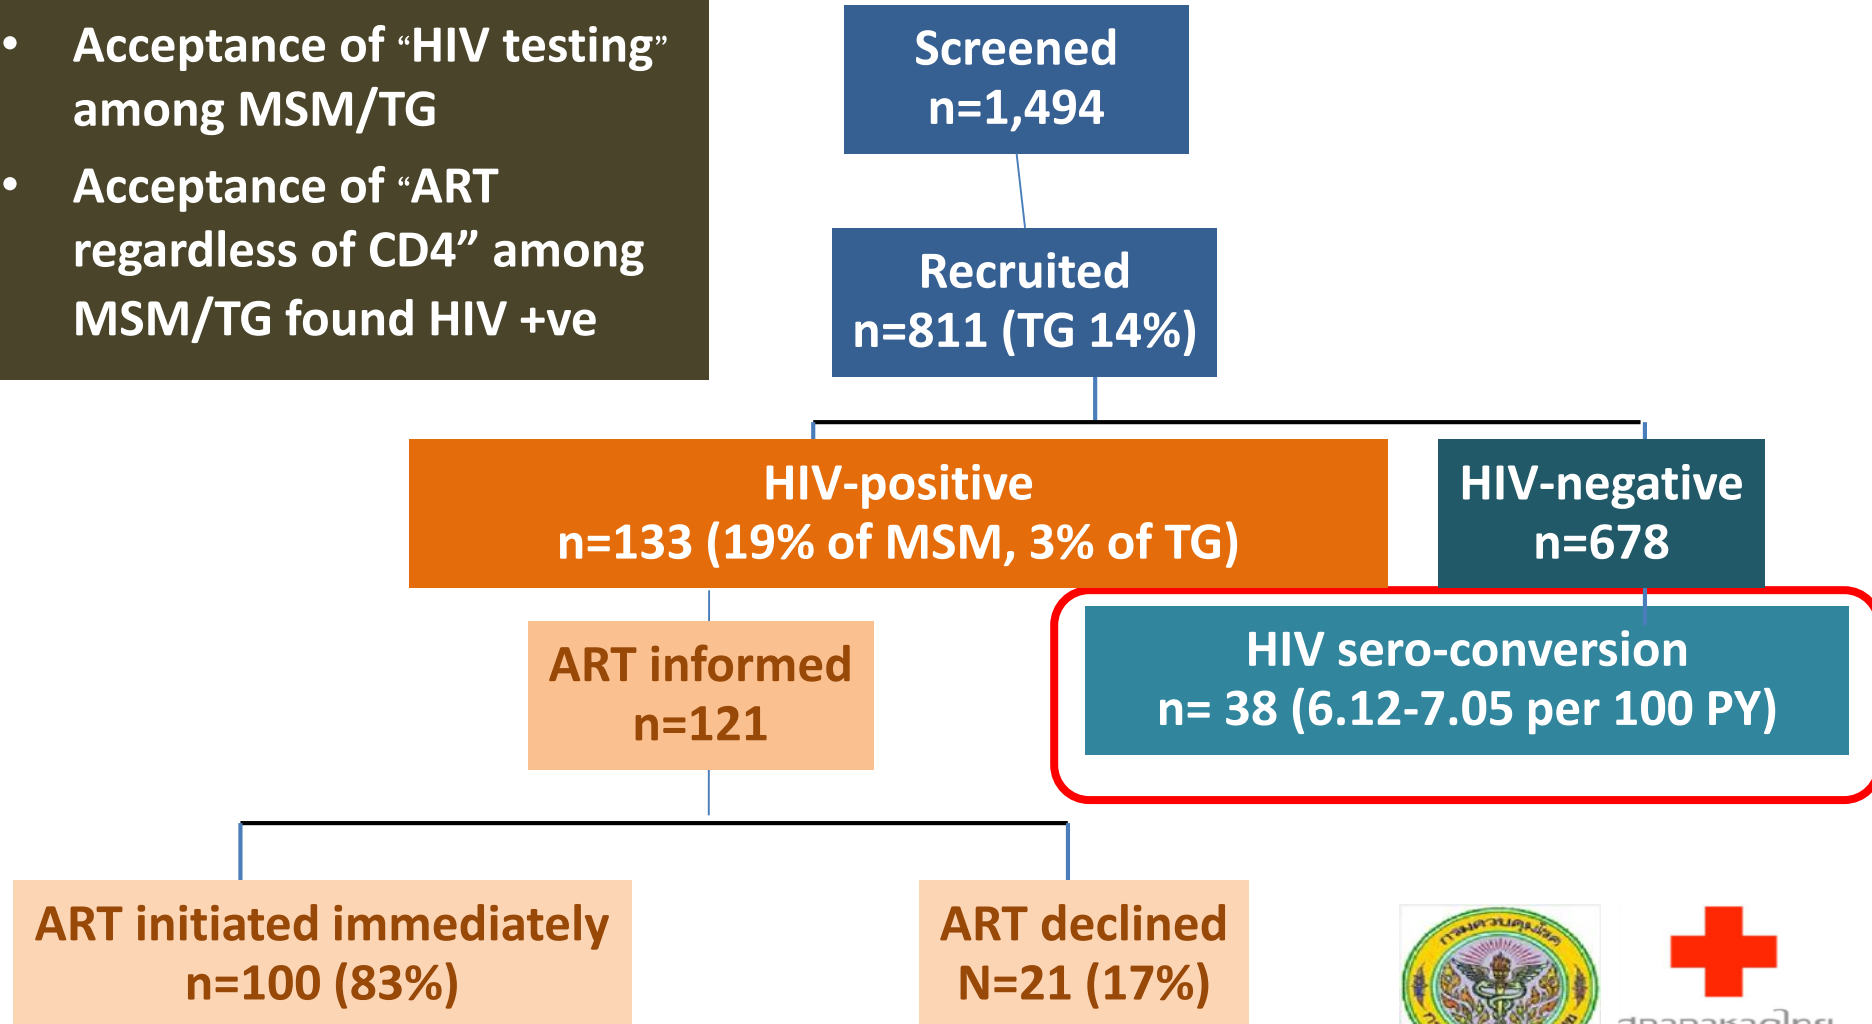

- **Less condom use**
- **ARV priority is for treatment**

# Preliminary results of “Test and Treat among MSM and TG”

## Nov 2012 – Sep 2014

### Study objectives

- Acceptance of “HIV testing” among MSM/TG
- Acceptance of “ART regardless of CD4” among MSM/TG found HIV +ve

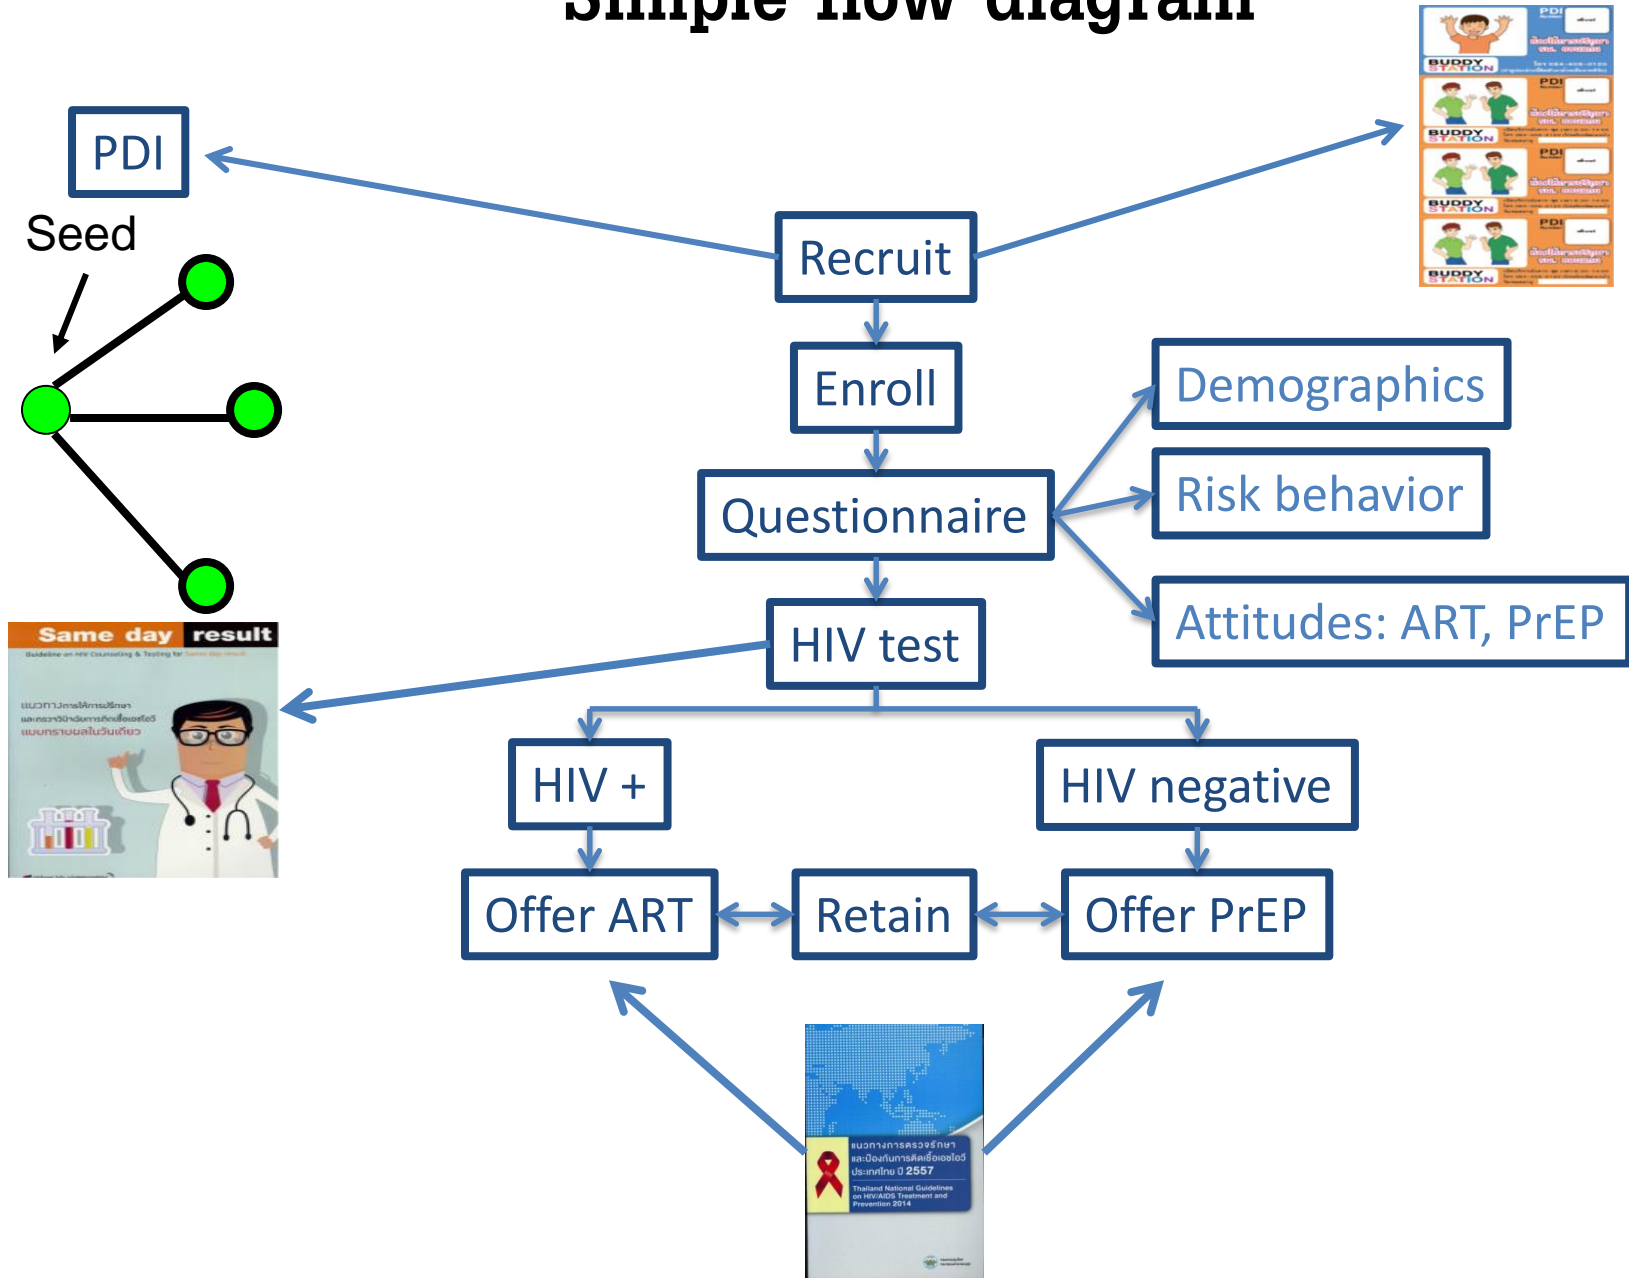

# Thai MSM/TG PrEP Substudy Objectives

- To determine the uptake of PrEP among HIV-negative MSM/TG and factors associated with PrEP acceptance

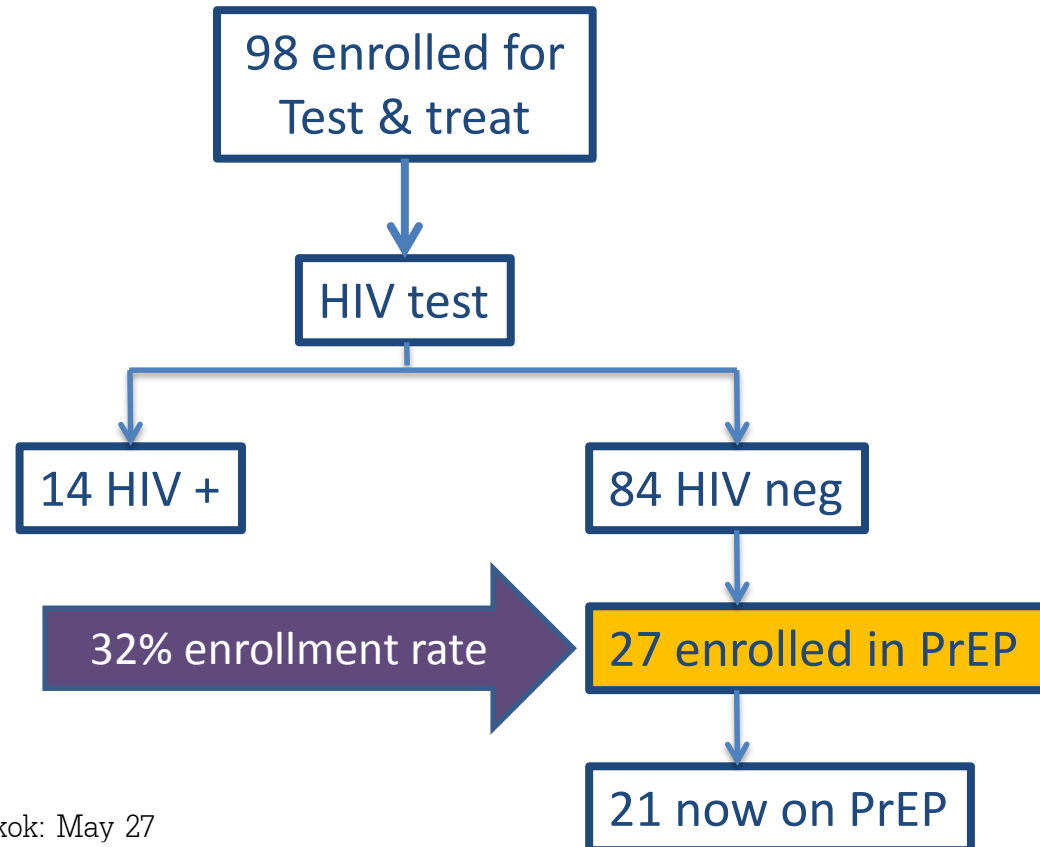

## Among MSM/TG who take PrEP

- To assess adherence to PrEP and retention in PrEP programs
- To assess the proportion who continue PrEP when they are required to pay for PrEP medicine
- To compare the acceptance of PrEP, adherence to PrEP, and retention rate at community-based and facility-based sites

# Simple flow diagram

# PrEP enrollment results (Lerdsen and Thammasat)

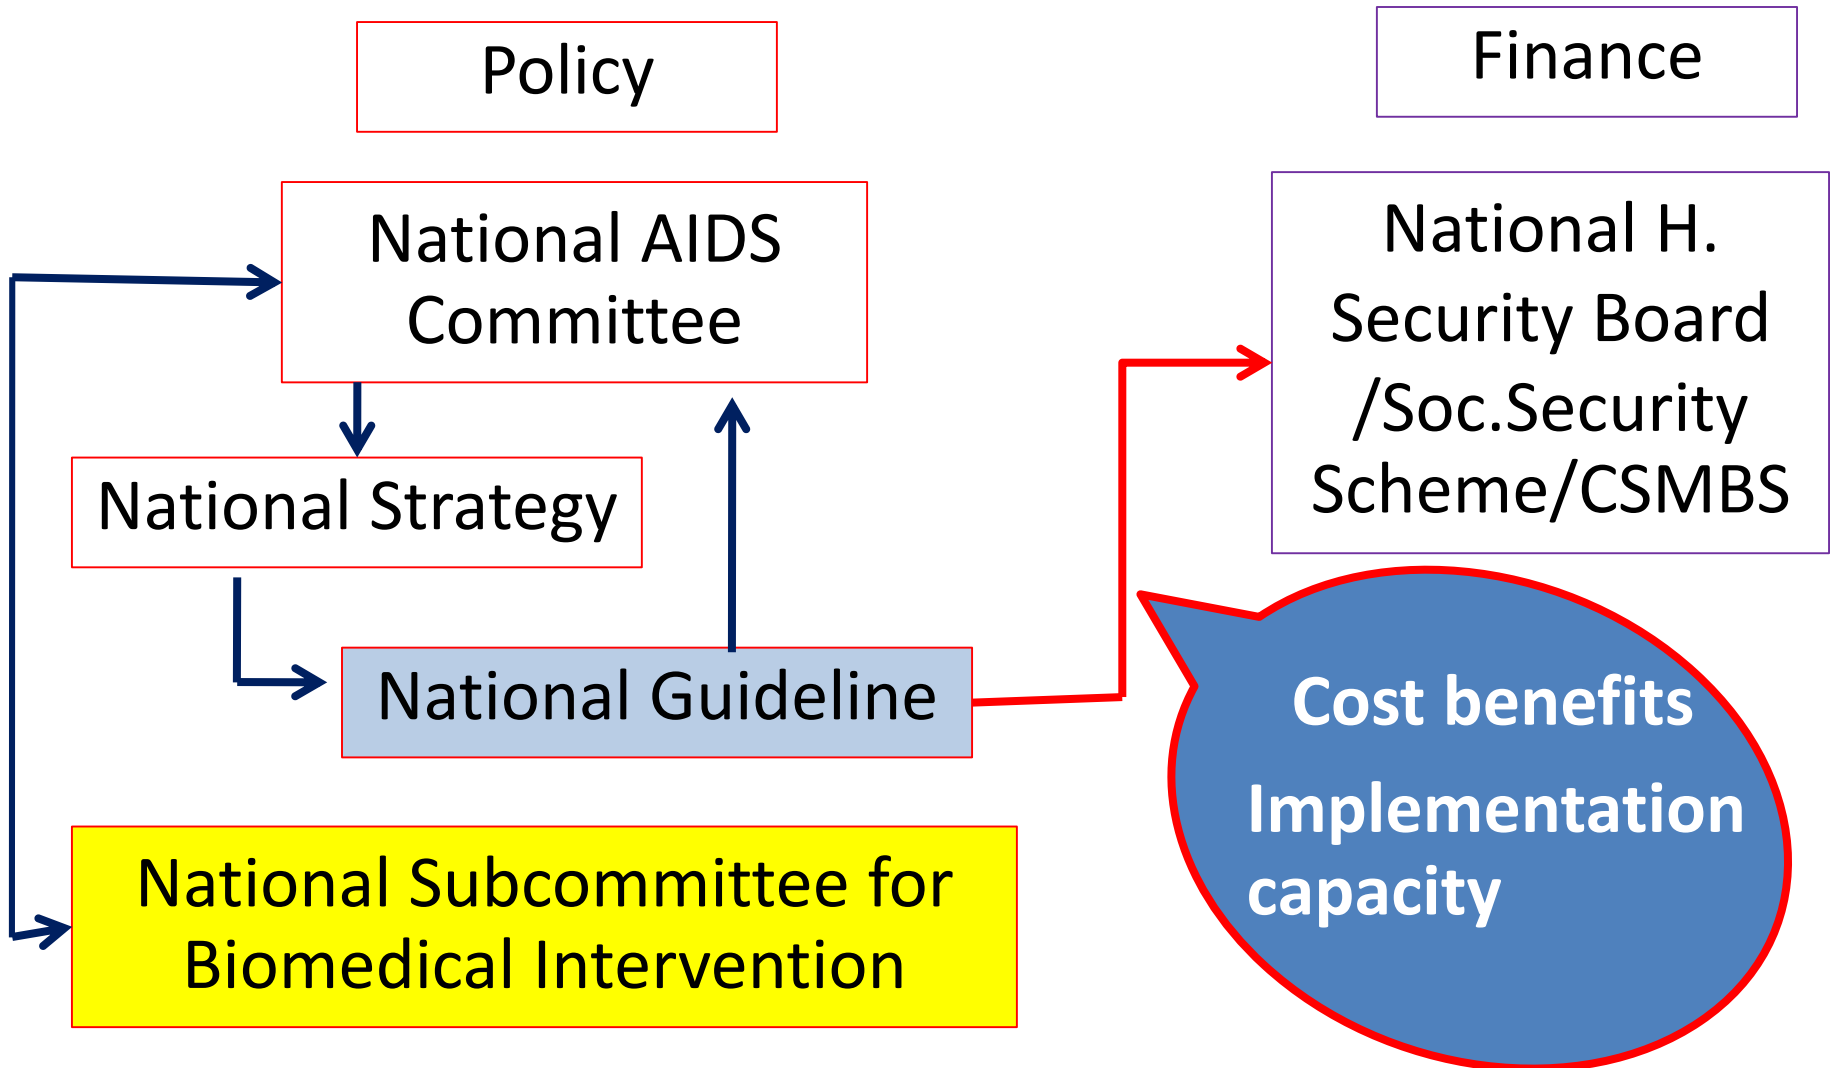

Lerdsen Hospital, Bangkok: May 27

Thammasat University, Bangkok: June 3

*\*As of August 21, 2015*
