

HIV Country Profile 2022

Maldives

Demographic and socioeconomic data

Total Population (2021)	GNI per capita, PPP (2021)
0.521 million	16 520 US\$
Maternal mortality per 100 000 live births (2017)	Health expenditure, total (% of GDP) (2019)
53	8%
Life expectancy at birth (2021)	Health expenditure per capita (2019)
37.4 years	854 US\$
Total fertility rate (births per woman) (2021)	Human Development Index Value (2019)
1.7	0.74

Progress towards 95-95-95 targets by 2025 (2021)

By 2025:
 - 95 percent of people living with HIV know their status
 - 95 percent of people living with HIV who know their status are receiving treatment
 - 95 percent of people on treatment have suppressed viral loads
 This results in 90% of all HIV positive people on treatment and 86% of all HIV positive people achieving viral suppression.

Estimated % of pregnant women living with HIV who received ARVs for PMTCT (2021)

Estimated ART coverage children and adults (2021)

Health sector cascade (2021)

Indicator	Value	Percent of 95-95-95
People living with HIV who know their status	N/A	N/A
People living with HIV receiving ART	N/A	N/A
People living with HIV with viral load suppression	N/A	N/A

Estimated number of people newly infected with HIV

Estimated number of people newly infected with HIV

Trend since 2010 ((Blank))

Epidemiological HIV data (2021)	Value
Estimated number of women (15+) living with HIV	N/A
Estimated number of people newly infected with HIV	N/A
Estimated number of people living with HIV	N/A
Estimated number of people dying from HIV-related causes	N/A
Estimated number of children aged 0 to 14 living with HIV	N/A
Estimated incidence rate per 1000 uninfected population	N/A
Estimated adult (15-49) prevalence	N/A

Antiretroviral therapy (ART) (2021)

Estimated ART coverage	N/A
Estimated ART coverage (adults 15+)	N/A
Estimated ART coverage (children, 0-14) ¹	N/A
Reported number of children receiving ART	
Reported number of people living with HIV receiving ART	N/A
Reported number of people living with HIV receiving ART (adults 15+)	N/A

Estimated number of people dying from HIV -related causes

Estimated number of people dying from HIV-related causes

Trend since 2010 ((Blank))

Elimination of mother-to-child transmission (EMTCT) of HIV & syphilis	Value	Year
Reported number of pregnant women living with HIV who received antiretrovirals for PMTCT	N/A	2021
Final transmission rate including breastfeeding period ³ (%)	N/A	N/A
Estimated percentage of pregnant women living with HIV who received antiretrovirals for PMTCT ² (%)	N/A	N/A
Antenatal care coverage - at least one visit (%)	98.7%	2017
Antenatal care coverage - at least four visits (%)	81.6%	2017
Antenatal care attendees who were tested for syphilis (%)	51.4%	2015
Antenatal care attendees who tested positive for syphilis and who received benzathine penicillin IM (%)	100%	2014
Antenatal care attendees who tested positive for syphilis (%)	0.1%	2014
% of pregnant women with known HIV status	N/A	N/A
% of infants born to women living with HIV receiving a virological test within two months of birth (EID) ¹ (%)	N/A	N/A

Tracing indicators for elimination of mother-to-child transmission. A color scheme (green, orange, red) is used to indicate if the country is on target to meet 2020 targets: ¹90% ²95% ³Less than 5

Key populations (2021)

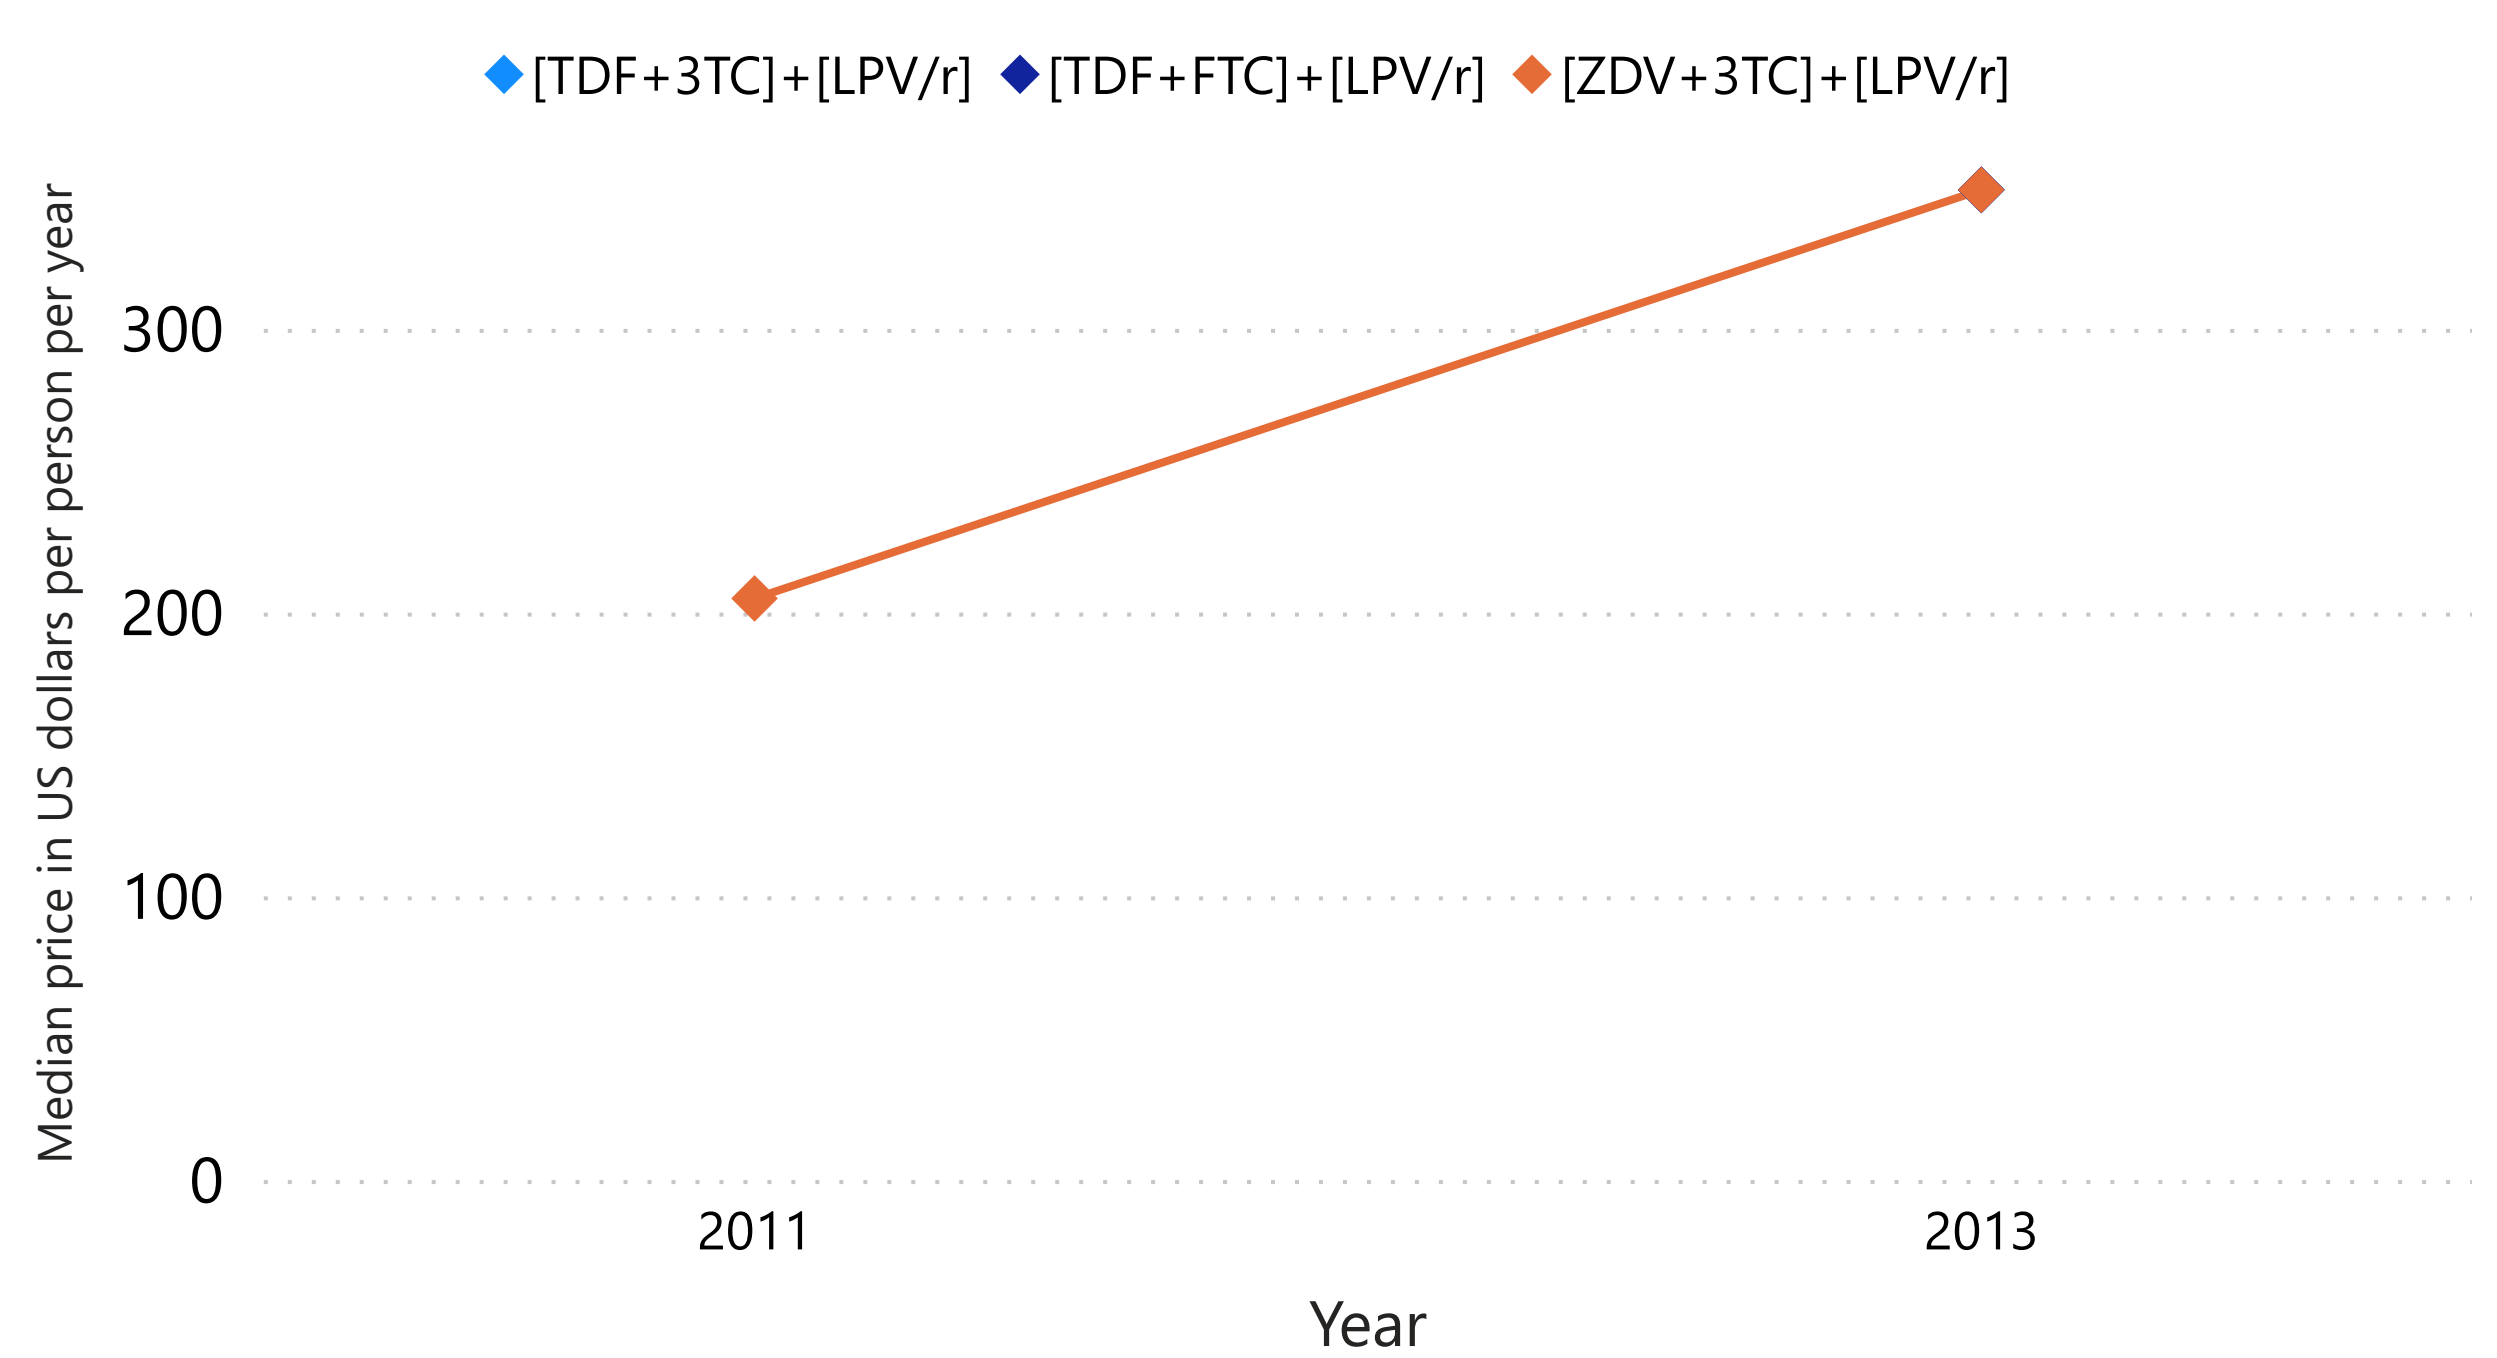

HIV prevalence among men who have sex with men (%)	N/A
HIV prevalence among people who inject drugs (%)	N/A
HIV prevalence among sex workers (%)	N/A
Needles distributed per person who inject drugs per year	N/A
Percentage condom use among sex workers with most recent client	N/A
Percentage of people who inject drugs receiving OST	N/A

Median annual price of ARV drug regimens for adults

First line

Second line

Median price in US dollars per person per year

National HIV policies and plans (2022)

Indicator	Value
Implementation of national policy on HIV self-testing (HIVST)	No HIVST policy ●
Treatment initiation threshold among adults and adolescents	Treat all regardless of CD4 count ●
Implementation of treat all policy among adults and adolescents	Implemented countrywide (>95% of treatment sites) ●
Implementation of lifelong ART for pregnant & breastfeeding women	Implemented ●
Treatment initiation threshold among children	Treat all, regardless of age ●
Adoption of WHO 2017 recommendation on rapid initiation of ART	data not available ●
National policy supporting community delivery of ART	data not available ●
Adoption of WHO recommendation to offer package of interventions for patients with advanced HIV disease	data not available ●
Policy on the frequency of clinic visits for adults who are doing well on antiretroviral therapy	data not available ●
Policy on how frequently adults who are doing well on antiretroviral therapy should pick-up antiretroviral medicine (MMD)	Every 3 months for adults who are doing well on ART ●
Dolutegravir (DTG) as part of 1st line ARVs for adults and adolescents	data not available ●
Implementation of national policy on viral load monitoring	Implemented in many (>50-95%) treatment sites ●
Availability of point-of-care viral load testing	data not available ●
National M&E plan or strategy for HIV	data not available ●
