

A Review of Strategies and Policies of the National Anti-Drugs Agency

Dr. Sangeeth Kaur
National Anti-drugs Agency
Ministry of Home Affairs

AN OVERVIEW

- The drug of choice in Malaysia is opiate-based drugs (heroin and morphine) and marijuana
- In the past decade, annually more than 35,000 drug addicts are identified in the country
- This has reduced significantly and in 2008, to about 25, 000 cases.
- From 1988 – 2008, there are 285, 762 addicts are registered with National Anti-Drugs Information System (NADI)
- The advent of synthetic drugs (ATS) is a present challenge to Malaysia

Introduction

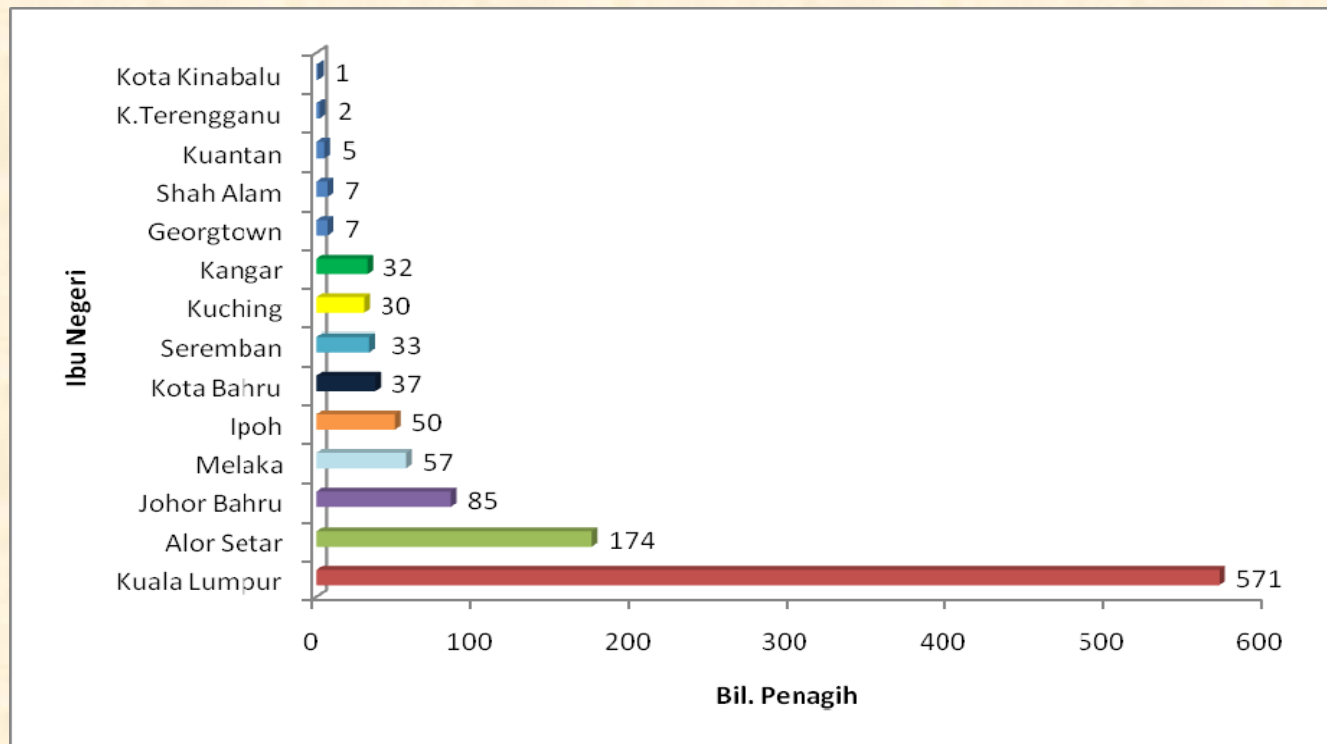

- Currently there are 6,894 clients undergoing treatment and rehabilitation in 28 institutions
- 34, 228 clients undergoing treatment and rehabilitation in the community

Program Methadone

Currently there are 24 Aftercare Centres (Pusat Khidmat AADK) that offers Methadone Maintenance Therapy with 407 clients on the programme

AADK is acting as partners of MOH in scaling up the MMT programme in Malaysia

There are plans to scale up the MMT programme further to a total of 65 community centres around Malaysia, with the aim of treating up to 100 patients in each centre
