Adolescent girls and young women

Proportion of women who experienced intimate partner violence

Girls who completed lower secondary education

Policy on life skills-based HIV and sexuality education (secondary schools)

Laws requiring parental consent for adolescents to access sexual and reproductive health services

HIV programme coverage and outcomes

KEY POPULATIONS

Sex workers

Gay men and other men who have sex with men (MSM)

People who inject drugs (PWID)

HIV prevalence

Estimates for new HIV infections are not available in 2020.

HIV programme coverage and outcomes

Usage of prevention interventions (as shown above)

Sex workers

Gay men and other men who have sex with men (MSM)

People who inject drugs (PWID)

ANTIRETROVIRAL DRUG-BASED PREVENTION

Pre-exposure prophylaxis

Number of people actively taking PrEP

Antiretroviral treatment

People living with HIV who are virally suppressed

Implementation of Prevention 2020 Roadmap

Ten actions

Elements of the 2020 Roadmap

1. HIV prevention needs assessment
2. HIV prevention targets
3. HIV prevention strategy
4. Legal and policy reforms
5a. Key population size estimates
5b. Defined key population package
5c. Adolescent girls and young women size estimates
5d. Adolescent girls and young women package
6. Capacity development and technical assistance plan
7. Social contracting
8. HIV prevention financial gap analysis
9. Strengthen programme monitoring
10. Performance review

HIV prevention adaptations during COVID-19

Safe continuation of outreach

Online counselling

Key populations

Condoms

Pre-Exposure Prophylaxis (PrEP)

HIV treatment

Safe injecting equipment (take home designs)

Note: ‘Yes’ refers to the adaptation having been introduced (but necessarily, it may not be sufficiently scaled).

Linkages between HIV and sexual and reproductive health services

HIV testing services integrated within sexual and reproductive health

Provider-initiated condom promotion in family planning services

Scoring (1–10)

Very good

Good

Medium

Low

Very low

id = insufficient data

na = not applicable

Note: the 2020 HIV estimates presented are for 2019. Other data points may refer to various years when the surveys were conducted.

Data sources: UNAIDS 2020 HIV estimates; Global AIDS Monitoring 2020; Global HIV Prevention Coalition progress survey 2020; and ICF – the DHS Program STATcompiler.

Target 2010–2020

Changes in new HIV infections

-75%

TARGET 2010–2020

HIV prevalence

Adults (15 years)

Young women 15–24 years

Sex workers 15 years

Gay men and other men who have sex with men 15–24 years

People who inject drugs
